

Jeremy Lerner

During the last 30 years Jeremy has developed custom spectroscopic instruments for scientific researchers. This includes the holographic diffraction gratings for the Hubble Space Telescope, and the original ozone monitoring satellites.

A search on "Jeremy Lerner" in "Google Scholar" reveals that he has nine patents, and is an author of 80+ scientific papers. Searching "Amazon.com" lists Jeremy as a chairman or co-chairman of nine professional conferences on photo-optical instrumentation and editor of their proceedings.

Jeremy is President of [LightForm, Inc](#), a company specializing in Hyperspectral Imaging systems.
