

## Astronomy Club of Asheville Website Backup and Storage Info

November 17, 2020

The club website host, Web Hosting Hub, backs up the entire website daily onto their servers. But it only stores one copy of the backup. That means that each day's backup replaces the one from the previous day. This could cause a problem if the website is corrupted, and it is not detected within 24 hours! That corrupted website could then become a backup and the only one available!

As a protection against that happening, the club now also uses a program (a WordPress plugin) called [Updraft Plus Premium](#) Personal to backup its website. It's currently set to perform backups each week on Sunday at 2:30 a.m. It will store up to 5 backups at a time before replacing the oldest backup. The cost for this annual service is \$70 for year one and \$42 for each year thereafter. The current annual renewal date is Nov. 17, 2020.

The login credentials for this annual service are:

Username: [arghiere@gmail.com](mailto:arghiere@gmail.com)

and password: 19corVus81

Order number (if they ask) #714221

Bernard Arghiere's name and mobile number (828-231-6714) are associated with this account, and it uses the club's credit card for automatic renewals. It also uses a birthday of 01/01/1981!

---

These Updraft Plus Premium backups are stored on a club [Google Drive](#) account with 100GB of annual storage for a \$20 charge per year. The current annual renewal date is Nov. 17, 2020.

The login credentials for this annual service are:
