

# Enrique Alberto Gómez, Ph.D.,

teaches physics and astronomy at Western Carolina University. For research he studies supernovae, variable stars, and exoplanets. He has also done research on cosmic rays and works with students to launch atmospheric balloons to the edge of space. He received his Ph.D. from the University of Alabama and his bachelors from the University of California, Santa Cruz. He was born in Mexico City, speaks Spanish as his first language, enjoys cooking and playing games with his daughter on a Nintendo Switch.
