

The 2022 Harvest Moon is Full on the night of September 9th/10th

On the night of **September 9th/10th**, this year's **Harvest Full Moon**, will brighten our night sky from dusk to dawn.

The "Harvest Moon" is defined as the full Moon that occurs closest to the northern hemisphere's autumnal equinox. This year's fall equinox occurs at 9:04 p.m. EDT on September 22nd.

Although this year's Harvest Moon occurs before the autumnal equinox, it can also occur after the fall equinox, as it did in the year 2020.
