

## September 2023 Highlight

### The Autumnal Equinox – Sept. 23<sup>rd</sup>

- ★ On **Saturday, Sept. 23<sup>rd</sup>**, at 2:50 a.m. EDT, the Sun begins its journey south of the celestial equator, bringing autumn to the northern hemisphere and spring to the southern hemisphere.
- ★ This event is called the “**autumnal (fall) equinox**” in the northern hemisphere.
- ★ On this day, all places on Earth experience nearly equal amounts of daylight and darkness – about 12 hours of each. “**Equinox**” literally means “**equal night**”.
- ★ For all places on Earth at the equinox, the Sun rises due east and sets due west.
