

March 2024 Highlight

Daylight Saving Time Begins March 10th

On **Sunday, March 10th**, at 2:00 a.m., **Daylight Saving Time** begins. Set your clock time forward by one hour.

Although it is called Daylight Saving Time, no daylight, time, or energy is saved! It should more appropriately be called daylight “shifting” time, as solar noon is no longer near correlation with our manipulated timepieces!

During the months of DST, in the Asheville area, “high solar noon” occurs well after 1:00 p.m. local clock time.
